

Immunizations for Adolescents - Combination 2

Who is eligible?

Immunizations for Adolescents - Combination 2 (IMA-CO2) assesses the percentage of adolescents 13 years of age who had one dose of meningococcal vaccine, one Tdap vaccine and the complete human papillomavirus vaccine series by their 13th birthday.

Meningococcal serogroups (A, C, W, Y) vaccine

- At least one meningococcal serogroups A, C, W, Y with a date of service on or between the member's 11th and 13th birthdays.

Tdap vaccine

- At least one tetanus, diphtheria toxoids and acellular pertussis (Tdap) vaccine with a date of service on or between the member's 10th and 13th birthdays.

HPV vaccine series

- At least two HPV vaccines with dates of service at least 146 days apart on or between the member's 9th and 13th birthdays.

OR

- At least three HPV vaccines with different dates of service on or between the member's 9th and 13th birthdays.

IMA-CO2 example

The patient's 13th birthday is the deadline for vaccine to successfully complete IMA-CO2.

IMA-CO2 claim codes

Meningococcal serogroups (A, C, W, Y) vaccine

Code system	Definition	Code
CPT	Meningococcal	90734

Tdap vaccine

Code system	Definition	Code
CPT	Tdap	90715

HPV vaccine

Code system	Definition	Code
CPT	HPV	90650, 90651

Per the *Texas Medicaid Provider Procedure Manual*, to ensure claim is submitted successfully, be sure to include both the appropriate procedure and diagnosis code.

CPT codes	ICD-10 diagnosis codes
90460, 90461, 90471, 90472, 90473, 90474	Z00.121* Z00.129†

* With abnormal findings.

† Without abnormal findings.

NOTE: TCHP uses Inovalon, a HEDIS certified software, to calculate HEDIS rates and includes historic claims from ImmTrac, the State's immunization registry.
